

Schroder International Selection Fund

Global Energy

A1 Accumulation Share Class

Investment Objective, Policy and Risk

To provide capital growth primarily through investment in securities of companies active in the energy sector.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Investments in equities are subject to market risk and, potentially, to currency exchange rate risk. This fund may use financial derivative instruments as a part of the investment process. This may increase the fund's price volatility by amplifying market events.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the Total Expense Ratio.

Source: Schroders - The Schroder ISF Global Energy fund was launched in June 2006 to accommodate a transfer of shareholders from the Schroder Energy Hong Kong Unit Trust (launched on 30/09/1987) to the Schroder ISF SICAV. Prior to June 2006 the fund uses the track record of the Schroder Energy Hong Kong Unit Trust as a proxy performance track record.

In January 2008, the benchmark of the Fund changed from the MSCI All Countries World Energy Index to the MSCI World Energy Sector Net TR USD Index. The previous benchmark performance has been kept and chain linked to the new benchmark.
